

Granular Safety Melt

Specifications & Properties

Flash Point: N/A

Physical State: colourless or white crystals

Flammable: No

Description

This is an economical nitrogen-based crystalline product that acts fast to melt ice over a broad temperature range, down to -30C. It is a dustless product that leaves a minimum of messy residue. This product is not recommended for use on concrete in poor repair, or concrete that has not been cured for at least 12 months. Caution should be exercised if used on low-strength concrete as pitting may occur. Remove excess water and slush from concrete surfaces. It is fast acting and will not harm carpeting or floor coverings under normal usage. It will not discolor concrete or pit asphalt.

Applications / Directions

Use on sidewalks, walkways, streets, bridges, etc. Sprinkle lightly and evenly over the surface of snow or ice. Sprinkle on traffic areas before a heavy snowfall or freezing temperatures to prevent hard ice from forming. This product can be used to provide traction for automobiles. Carry a supply in the car and sprinkle under tires to provide better traction.

Packaging & Handling

Is available in 20kg bag, 50 kg drum, 180 kg drum 10 kg pail, 20 kg pail
